SYSTEM REQUIREMENTS FOR xPlainTV WAITING ROOM INFORMATION SOFTWARE

Revised: 04/05/2018   (Valid for 60 Days from Last Revision)

BASE SPECIFICATION FOR VERSION 5 (PREVIOUS VERSIONS ARE NOT SUPPORTED)

This document is intended as a guide when integrating xPlainTV into your practice.

COMPONENT	MINIMUM REQUIREMENTS
CPU	Dual Core 2.0GHz +
RAM	512 MB
HDD	6 GB Hard Drive space (v2017)
Optical Drive	DVD
Printer	Colour printers for the patient leaflets are preferable. In order to print these leaflets the computer must have a word processor capable of reading .DOC files installed (Eg: Microsoft Word, Open Office, etc).
Graphics Adaptor	Capable of 1024 x 768 or higher resolution
Multiple Display Setup	A graphics adaptor that has multiple output ports (1 per display). As each display and graphics adaptor can have different inputs/outputs* you will need to ensure the output is the same as the input, or purchase cable adaptors. NOTE: Large displays may require more powerful graphics adaptors to be installed in your computer. * Common input/outputs are VGA, DVI, HDMI and Display Port
Audio	If you intend to use audio, you MUST use a HDMI cable otherwise you will need to plug in a separate audio cable from the PC into the display.
Operating System	Windows 10 ® (32/64 Bit) Windows 8/8.1 ® (32/64 Bit) Windows 7 ® (32/64 Bit)
